

Carillion Delivers Another Community Project in Oxford

St Michael's School – Summer 2013

Carillion Health has been supporting the John Radcliffe, one of the largest Acute Teaching hospitals in the UK with delivery of facilities and estates services since 2005. Hospitals sit at the heart of our communities and as such our sustainability strategy places key emphasis on integrating our service teams with those local communities to deliver legacy benefits.

This Summer, through Business In The Community, our team at the John Radcliffe made measurable improvements to the external environment at St Michael's school.

Before

After

Sue Grundy, Headteacher at St Michael's, expressed her delight to the Carillion team:

"Dear Mike and Rebecca

I am writing to thank you for organising the project at St Michael's. I know that setting up the project has taken a considerable amount of your time but the end result is absolutely brilliant! The team working on site were fantastic - really taking account of the needs of the school as they carried out the work. The area that they were working on has really been transformed and now provides a great welcome area to the school.

We had a Governors' Buildings and Sites Committee meeting yesterday whilst the work was being carried out and the Governors were so impressed by the project and the fact that it had come about through the Business in the Community initiative and the partnership that had been formed with Carillion. They wish me to pass their thanks to you both. The area was in use almost immediately after the team of workers left the site. Some of our Year 1 children had their reading workshop activities out there this afternoon. Their teacher took some photographs and once she has sent them to me I will pass them on to you both. I will put a piece in our fortnightly newsletter to thank you both and also the contractors who have been involved. I hope that you will both be able to come to St Michael's to see the fruits of your labour. Very best wishes and thanks. "
