PowerStudio[®]
PC Power Management Solution

Barts and The London **NHS**
NHS Trust

PowerStudio[®] is saving Barts and The London NHS Trust £10,000 a month whilst tailoring the power-saving policies to suit their business needs

By using PowerStudio[®] Barts and the London NHS Trust have quantified evidence of the savings which have been made and reduced the number of carbon credit purchases required under the CRC scheme

The Challenge

- Numerous PCs – Clinical and Non-Clinical
- PC's spread across multiple locations
- Various staff work patterns for power management policies to accommodate
- Finding a simple solution that could be easily deployed to 5,550 PC's and Laptops
- A solution with strong reporting features that provides evidence of money and carbon savings
- To reduce the amount of Carbon Credits being purchased and provide evidence under the CRC Scheme
- To improve the organisation's green credentials

Solutions Summary

By working closely with the team at Barts and the London NHS Trust, Certero were able to understand their requirements and present a detailed evaluation. Within 2 weeks the solution had proven on its ability to deliver, providing strong evidence of PC usage across the estate – and more importantly, the savings to be made.

Customer Profile

Barts and the London NHS Trust is one of Britain's leading healthcare providers.

With 7,500 employees the hospitals' full portfolio of specialist centres includes the country's biggest heart attack centre, one of Europe's most advanced Cancer centres, one of the UK's largest children's hospitals and a highly successful fertility centre.

Barts is Britain's oldest hospital and the School of Medicine and Dentistry was the country's first. Referrals are received from overseas and throughout the UK, but the majority of the 700,376 annual attendances are patients living locally.

The Solution

During the Free 30 Day Trial the team at Barts and the London NHS Trust realised that they required a simple to deploy solution that could be centrally managed and deployed to deliver cost saving reports. When the evaluation was presented, Certero were able to discover a high overnight power waste - 85% - which meant the potential energy savings could recoup the cost of the solution within 4 months.

With the entire PC estate encompassing up to 26 buildings, the solution needed to apply multiple power saving policies to various organisational units.

PowerStudio® solution enabled:

- Easy client deployment using the web-based administration console
- Automatic saving, closing and opening of applications and documents meaning no documents are lost
- Additional savings created during working hours by powering down monitors when idle

Since implementing the solution and applying policies, the Trust have saved £28,785.40 and an estimated 206 tonnes saving of CO2 in the first quarter, contributing to the government target of a 10% carbon reduction by 2015.

The Benefits

- Return on Investment within 4 Months
- Free 30 Day Trial provided key data for the savings to be made
- Involves the user community in carbon reduction initiatives within the organisation
- Raises the profile of the organisation by recognising green credentials
- Reduces the number of carbon credit purchases by identifying annual carbon usage

Certero Products are Compatible with Windows® 7 and have been tested to meet all of the technical requirements to be Compatible with Windows® 7.

What the Customer Says

"The free 30 day trial provided a strong analysis of the key data required to prove there was a power saving issue that needed addressing. The results from the trial quantified the evidence for the savings to be made and the quick return on investment made the solution very attractive.

PowerStudio® is easy to deploy and engages staff. It is a solution that all organisations should consider as it provides all the necessary functionality to reduce energy and significantly decrease carbon usage."

Fiona Daly, Environmental Manager
