

## Carillion: Sustainability Investment Fund

### Sustainability

SEPTEMBER 2014

**Have you got a great idea that will make a difference to one or more of our six positive outcomes, but it needs a bit of cash to turn it into a reality? If the answer is yes we want to know about it!**

Since its launch, the Sustainability Investment Fund (SIF) has provided over £700,000 to help the research and development of innovative ideas to sustainability problems. This has included [solar panel installation in Dubai](#), ways of measuring [fuel consumption](#) on our construction sites and [energy behaviour change programmes](#) like the hugely successful Birch Street Unplugged.

**Is the application process putting you off? Think it's too hard?**

Well, based on feedback, [we have now made the application process even simpler!](#) If your idea requires funding of £5,000 (or equivalent value) or less, it just needs to be signed off by our Finance team and approved by David Picton, Chief Sustainability Officer. After this, you'll have the funding you need to turn your idea into a reality! If you need more than £5,000 (or equivalent value), you'll need to give us a few more details, which your local Sustainability contact can help you with.

**Apply for funding today – it won't take long!**

1. Take a look at the [guidance notes](#), which tell you more about the SIF and give you an example of a previous project that's received funding and how to complete the short online application form.
2. Click to complete the [online application form](#).
3. Wait to hear from your local Sustainability team members, who will review your application.

**So what are you waiting for?**

Get together with your teams and let us know if there's something that you think could make a real difference to how we can work more sustainably at Carillion.

If you'd like more information about the SIF, simply email [sustainability@carillionplc.com](mailto:sustainability@carillionplc.com).
