

Case Study

EEVS support to NHS Trusts

Guy's and St Thomas' 
NHS Foundation Trust

Guy's and St Thomas' is undertaking a substantial investment to transform the energy efficiency of our hospitals. We recognise the importance of proving the performance of energy efficiency measures – without this element we can't evaluate what the investment has achieved and whether the project is on track. There is always a risk with these projects that energy-saving measures could underperform, and without the right processes in place, that underperformance would go unnoticed and guarantees could go unenforced. We have enlisted the help of EEVS to ensure a robust M&V Plan is in place to minimise this risk for us. The highly professional and detail-oriented approach taken by the EEVS team has allowed us to proceed through various levels of approval for the investment with confidence.”

Alexandra Hammond,
Guy's and St Thomas' NHS Foundation Trust
Associate Director, Sustainability

Barts Health 
NHS Trust

EEVS have provided invaluable support while we have been developing our Energy Performance Contract at Barts Health. This is one of the most integrated and innovative EPCs to have been attempted in this country, so we're breaking new ground in lots of ways throughout the process. The Measurement and Verification aspect of the project is crucial as it is the tool we will use to measure our success and to work with our partners manage their guarantees. EEVS' independent stance, along with their experience of industry best practice and knowledge of the key risks in this specialist and technical arena, has been, and continues to be, very important to us.”

Fiona Daly,
Barts Health NHS Trust
Environmental Manager

Other Trusts we are supporting:

- Northern Lincolnshire and Goole NHS Foundation Trust
 - United Lincolnshire Hospitals NHS Trust
- Along with a number of other NHS Trusts across the UK
