

NHS SUSTAINABILITY AND THE IMPACT OF COVID-19

JULY 2ND, 2020

10.30 Chair introduction

Speaker: Scott Buckler, Campaign Manager, NHS Sustainability Campaign

10.40 What can we learn about Procurement from Covid-19 PPE experience?

Speaker: Neil Hind, GM NHS Procurement Director & Stephen Pickard, Category Manager, NHS Wales Shared Services Partnership

10.55 Can Reuse support NHS budgets when financial impact hits?

Speakers: Paul Broadberry, Country Manager UK, Vanguard Medical Devices & Daniel O Connor, CEO, Warp-It

11.10 The important role of sustainable transport for social distancing

Speaker: Will Blair, Sustainability Manager, The Christie NHS Foundation Trust

11.25 Can recycling survive against Coronavirus?

Speaker: Oli Slaughter, Sustainability Officer, Care Without Carbon, Sussex Community NHS Foundation Trust

11.40 How do we keep up with clinical waste demands?

Speaker: Fiona Daly, Sustainability and EFM Workforce Lead, NHS England

12.00 Total Waste Management - Improving Waste Practices, Deliver Cost Savings and Protect the Environment

Speaker: Ben Williams, Waste Contract Manager, Kings College Hospital Foundation Trust

12.20 Supporting the NHS carbon journey

As the largest contributor to the public sector's carbon emissions accounting for 5% of UK total carbon emissions the NHS will play a key role in achieving UK carbon commitments. This session explores the NHS's sustainability journey, the risks and opportunities the current crisis presents, and the support supply chain brings to delivering solutions.

Speaker: Andrew Smith, Lead Research Environment and Sustainability, Crown Commercial Service

12.40 Reacting to the new world of water in 2020

Water use is changing. As we return to work water use will go up as people wash hands more frequently; this against the background of increasing water shortages demands us to look at ways of efficiently saving water. Added to that is the increasing demand for better hygiene on sites to make the difference

Speaker: Nigel Codman Director, Novaloo Ltd

13:00 Decarbonising the NHS through the use of renewable fuels

Argent Energy Ltd. Would like to highlight the main contributors to high CO2 usage within the NHS and explain ways in which using renewable fuel can help reduce CO2 across both power generation and road usage. We will explain the benefits of a sustainable future and demonstrate how Argent can help the NHS significantly reduce its carbon footprint.

Speaker: Colin Duke, Head of Sales, Argent Energy

13.20 Are clinicians the new sustainable champions?

Speaker: Frank Swinton, Climate Change Lead & Anaesthetic Consultant, West Yorkshire and Harrogate Health and Care Partnership

13.45 elemental Healthcare

Speaker: Geoff Miller, Regional Sales Manager, North, elemental Healthcare

14:00 Panel session & Q&A- How do we sustain this carbon-free culture for the future?
